Item Title: Linear Crusher Purchase

*Please answer the who? what? when? why?*

The Roads department requested and was approved \$507,500, to purchase a linear crusher as part of the 2023 Equipment budget. This piece of equipment is sold by a company named Vanway out of Kingston, Idaho. Vanway currently has one linear crusher in-stock that was recently built for the U.S. Forest Services. The U.S. Forest Service isn't ready to purchase at this time and we are being told by Vanway that there are several organizations that are in line to purchase a linear crusher and they will sell this one to us because we are ready to purchase it by the first week in January. If we are unable to purchase this one, Vanway will not be able to guarantee the price, they will require half the cost paid up front and it will take 9 to 12 months to build. That is assuming there are no supply chain issues. We request permission to expedite this purchase to save potential supply chain issues that could result in additional cost to purchase.

This purchase is over \$100,000 and is a sole source vendor.
