Item Title: Hot Box Trailer Equipment Purchase

Please answer the who? what? when? why?

Roads Department is seeking approval for the purchase a "Demo" Falcon Asphalt Hot Box trailer with 100 hours of use. This trailer is essential in repairing potholes during the winter months (as well as year-round). We've obtained three quotes (attached) for the equipment. Our preference is to acquire the demo unit, as it's currently in stock, while all other options have a lead time of four months.

This purchase includes a dual burner system, which allows us to recycle asphalt and millings and reclaim unused hot mix throughout the year. It will also facilitate the transportation of both hot and cold mix asphalt while maintaining their temperatures throughout the day, enabling us to hold asphalt up to 72 hours. This significantly reduces asphalt waste and the need for trips to and from the asphalt plant. This equipment is designed to provide an optimal shoveling height for our workers minimizing the risk of strains.

This equipment was not originally planned in this year's budget. However, it will replace a ten-year-old machine that is no longer operational and will be listed as surplus. We do have the funds available in this year's budget to cover the expense due to other equipment purchases coming in under budget.
